

FIG. 1a

DATA FROM THE 1970-1971 SEASON

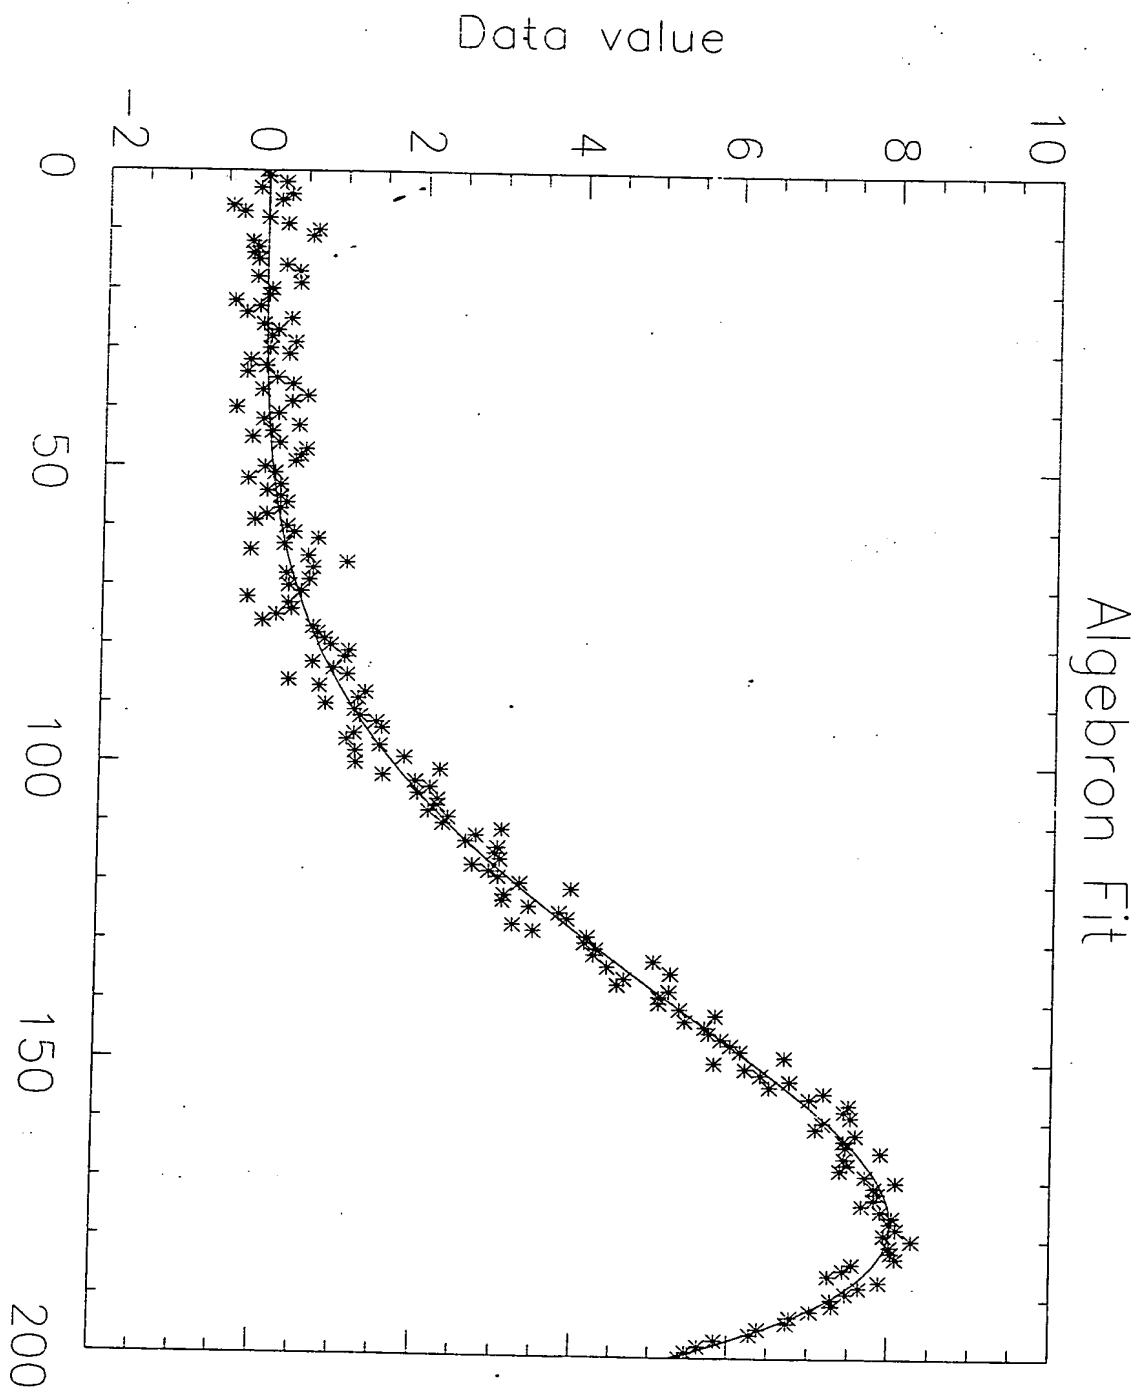

FIG. 1b

FIG. 1b is a graph showing the data value versus the x-value. The data value ranges from -2 to 10, and the x-value ranges from 0 to 200. The data points are marked with asterisks, and a smooth curve is fitted to the data. The curve starts at (0,0), rises sharply to a peak of about 0.5 at x=25, then continues to rise more gradually, reaching a value of about 3.0 at x=150, and finally slightly decreasing to about 2.0 at x=200.
